

CAUTIONARY STATEMENT

This presentation contains forward-looking statements concerning Advanced Micro Devices, Inc. (AMD) such as the features, functionality, performance, availability, timing and expected benefits of AMD's current products, future products and product roadmaps, which are made pursuant to the Safe Harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are commonly identified by words such as "would," "may," "expects," "believes," "plans," "intends," "projects" and other terms with similar meaning. Investors are cautioned that the forward-looking statements in this presentation are based on current beliefs, assumptions and expectations, speak only as of the date of this presentation and involve risks and uncertainties that could cause actual results to differ materially from current expectations. Such statements are subject to certain known and unknown risks and uncertainties, many of which are difficult to predict and generally beyond AMD's control, that could cause actual results and other future events to differ materially from those expressed in, or implied or projected by, the forward-looking information and statements. Investors are urged to review in detail the risks and uncertainties in AMD's Securities and Exchange Commission filings, including but not limited to AMD's most recent reports on Forms 10-K and 10-Q.

AMD does not assume, and hereby disclaims, any obligation to update forward-looking statements made in this presentation, except as may be required by law.

FOOTNOTES

- GD-106:** Overclocking AMD processors, including without limitation, altering clock frequencies / multipliers or memory timing / voltage, to operate beyond their stock specifications will void any applicable AMD product warranty, even when such overclocking is enabled via AMD hardware and/or software. This may also void warranties offered by the system manufacturer or retailer. Users assume all risks and liabilities that may arise out of overclocking AMD processors, including, without limitation, failure of or damage to hardware, reduced system performance and/or data loss, corruption or vulnerability.

GD-150: Max boost for AMD Ryzen processors is the maximum frequency achievable by a single core on the processor running a bursty single-threaded workload. Max boost will vary based on several factors, including, but not limited to: thermal paste; system cooling; motherboard design and BIOS; the latest AMD chipset driver; and the latest OS updates.
- GD-190:** For additional information see www.amd.com/advantage
- RMB-73:** Testing as of May 5, 2022, by AMD Performance Labs using an ASUS Zenbook S 13 OLED (Ryzen 7 6800U CPU, 32GB LPDDR5-6400, Samsung CL4-4D1024-Q79 NVMe 1TB, 21.40 graphics driver, Windows 11 build 22000.652, BIOS 306) versus MSI Summit E13 Flip Evo (Intel Core i7-1260P, 2x8 LPDDR5-6400, 30.0.101.1369, Micron MTFDKBA512TFH NVMe 512GB, Windows 11 build 22000.596, BIOS 106). 3D graphics performance tested with 3DMark® TimeSpy, 3D Rendering performance tested with Cinebench R23 nT, Office productivity performance tested with PCMark® 10. Results may vary.
- RMB-74:** Testing as of May 5, 2022, by AMD Performance Labs using ASUS Zenbook S 13 OLED (Ryzen 7 6800U CPU, 32GB LPDDR5-6400, Samsung CL4-4D1024-Q79 NVMe 1TB, 21.40 graphics driver, Windows 11 build 22000.652, BIOS 306). Godfall tested at 1920x1080 with low image quality preset, FidelityFX Super Resolution set to "Quality" mode, and DirectX® 12 enabled. The stated framerate is an average FPS score. Results may vary.
- RMB-75:** Testing as of May 5, 2022, by AMD Performance Labs using a Lenovo Yoga Slim 7 Pro X (Ryzen 7 6800HS, Radeon 680M integrated RDNA 2 graphics core, graphics driver 21.40, 2x8 DDR5-6400, 512GB NVMe SSD, Windows 11 build 22000.593). All games tested with 1920x1080 with low image quality preset, all framerates are average FPS. Results may vary.
- RMP-31:** Based on testing by AMD as of 4/1/22. Productivity performance evaluated with simultaneous operation of nine-participant Microsoft Teams video conferences using the UL Procyon Office Productivity benchmark. System configuration for Intel® Core™ i7-1260P CPU/GPU performance: Lenovo ThinkPad X1 Carbon, Intel Iris Xe Graphics, 2X8 GBytes RAM (LPDDR5-5500), 1TB SSD, BIOS version N3AET45W (1.10), Windows 11 Pro. System configuration for Ryzen™ 7 PRO 6860Z: Lenovo ThinkPad Z13, 2x16GB LPDDR5-6400, Windows 11 Pro, 1TB SSD, AMD Radeon 680M graphics, GPU driver 30.0, BIOS N3GET12WE (0.12). Performance may vary.
- RMP-32:** Based on testing by AMD as of 4/1/22. Battery life evaluated in hours using a nine-participant Microsoft Teams video conference with camera on, 200 nit brightness, slider position AC#2 (Balanced), with 95% utilization. Battery life results normalized for battery capacity differences. System configuration for Intel® Core™ i7-1260P CPU/GPU performance: Lenovo ThinkPad X1 Carbon, 57 watt hour battery, Intel Iris Xe Graphics, 2X8 GB RAM (LPDDR5-5500), 1TB SSD, BIOS version N3AET45W (1.10), Windows 11 Pro. System configuration for Ryzen™ 7 PRO 6860Z: Lenovo ThinkPad Z13, 50 watt hour battery, 2x16GB LPDDR5-6400, Windows 11 Pro, 1TB SSD, AMD Radeon 680M graphics, GPU driver 30.0, BIOS N3GET12WE (0.12). Actual battery life will vary based on several factors, including, but not limited to: product configuration and usage, software, operating conditions, wireless functionality, power management settings, screen brightness, and other factors. The maximum capacity of the battery will naturally decrease with time and use.
- RMP-33:** All battery life claims are approximate. Battery life tested by HP as of 4.7.22, using the Bapco MobileMark 18 benchmark test on an HP Elitebook 865 G9 laptop configured with a 76Whr battery, Ryzen PRO 6850U processor with Radeon graphics, 256GB HDD, 8GB memory, Win 10 Pro, video resolution of 1920 x 1200 x 60 Hz and the power slider set to "better battery." Actual battery life will vary based on several factors, including, but not limited to: product configuration and usage, software, operating conditions, wireless functionality, power management settings, screen brightness and other factors. The maximum capacity of the battery will naturally decrease with time and use. AMD has not independently tested or verified the battery life claim. For more information about HP's published battery life testing and the MobileMark 18 benchmark test, see <https://results.bapco.com/fdr/63601890f0f14ab5c99c634be6721d95>.
- R5K-107:** Based on testing by AMD as of 12/14/2021. Performance evaluated with Watch Dogs Legion, Far Cry 6, Gears 5, Final Fantasy XIV, Shadow of the Tomb Raider and CS:GO. All games test at 1920x1080p resolution with the HIGH in-game quality preset (or equivalent). System configuration: Ryzen 7 5800X3D and AMD Reference Motherboard with 2x8GB DDR4-3600. Core i9-12900K and ROG Maximus Z690 Hero motherboard with BIOS 0702 and 2x16GB DDR5-5200. Both systems configured with GeForce RTX 3080 on driver 472.12, Samsung 980 Pro 1TB, NZXT Kraken X62, Windows 11 28000.282.
- RPL-001:** Testing as of May 5, 2022, by AMD Performance Labs. Single-thread performance evaluated with Cinebench R23 1T. AMD Ryzen 9 5950X System: ASUS ROG Crosshair VIII Hero X570, 2x8 DDR4-3600C16. AMD Ryzen 7000 Series: AMD Reference X670 Motherboard, 16-core pre-production processor sample, 2x16GB DDR5-6000CL30. All systems configured with Radeon™ RX 6950XT GPU (driver: 22.10 Prime), Windows 11 Build 22000.593, Samsung 980 Pro 1TB SSD, Asetek 280MM liquid cooler. Results may vary.

FOOTNOTES

- **RPL-002:** Testing as of May 5, 2022, by AMD Performance Labs using pre-production silicon and performance projections for final products which are subject to change when released in market. Sequential/sustained disk throughput measured with CrystalDiskMark. AMD Ryzen 7000 Series: AMD Reference X670 Motherboard, 16-core AMD Ryzen 7000 Series pre-production sample, 2x16GB DDR5-6000CL30, PCIe® Gen 5 prototype SSD versus Phison E18+ PCIe® Gen 4 SSD, Radeon RX 6950XT (driver: 22.10 Prime), Windows 11 Build 22000.593, Asetek 280MM liquid cooler. Results may vary and/or are subject to change as the storage ecosystem develops and final products are available.
- **RPL-003:** Testing as of May 5, 2022, by AMD Performance Labs using pre-production silicon and performance projections for final products which are subject to change when released in market. Render time measured in seconds to complete an AMD Ryzen 7000 Series processor wallpaper render. AMD time: 204 seconds, Intel time: 297 seconds. Lower score is better. Core i9-12900K System: ASUS ROG Maximus Z690 Hero, 2x16 DDR5-6000CL30. AMD Ryzen 7000 Series (pre-production 16 core): AMD Reference X670 Motherboard, 2x16GB DDR5-6400CL32. All systems configured with Radeon™ RX 6950XT (driver: 22.10 Prime), Windows® 11 Build 22000.593, Samsung 980 Pro 1TB, Asetek 280MM liquid cooler. Results may vary.
- **RM-069:** Based on AMD internal analysis as of May 10, 2022, comparing the z-heights of the following AMD Advantage™ laptops as reported by the respective manufacturers' websites: 2022 Lenovo Legion Slim 7, 2022 Lenovo Legion 7, 2022 ROG Zephyrus G14 (w/o AnimeMatrix), 2022 ROG Zephyrus G14 (with AnimeMatrix), 2021 ROG Strix G15, 2021 Omen 16, 2021 Lenovo Legion 5, 2021 MSI Delta, 2021 MSI Alpha. RM-069
- **RM-070:** Testing done by AMD performance labs, May 10, 2022, on Lenovo Legion Slim 7 equipped with Ryzen 7 6800H CPU, Radeon RX 6800S GPU VBIOS BRT92798.001, SBIOS KFCN15WW 4/2/2022, 24GB DDR5 memory, Win 11. Tested at 1080p on the following games and settings: Battlefield 5 @ DX12 Ultra, Death Stranding @ DX12 Very High, DEATHLOOP @ DX12 Ultra, DOOM Eternal @ Vulkan Ultra Nightmare, Far Cry 6 @ DX12 Ultra, Hitman 3 @ DX12 Ultra, DOTA 2 Reborn @ DX11 Ultra, Player Unknown's Battlegrounds @ DX12 Ultra. Laptop manufacturers may vary configurations, yielding different results. Performance may vary. RM-070
- **GD-198:** SmartAccess Graphics technology enablement requires select laptops configured with a UHD resolution display, AMD Radeon™ RX 6000 graphics and AMD Ryzen™ 6000 series processor. For additional information, see <https://www.amd.com/en/graphics/amd-radeon-rx-laptops>. GD-198.
- **RM-067:** Testing done by AMD labs, April 19, 2022, on an HP OMEN 16 laptop equipped with a Ryzen 9 6900HX CPU, Radeon RX 6650M XT GPU, 16GB x 2 DDR5, with SmartShift Eco ON, power mode "Best Battery," at 1080p resolution, Medium setting in League of Legends vs SmartShift Eco OFF power mode "Best Performance" @ High setting. Laptop manufacturers may vary configurations with different results. Actual game play time may vary. RM-067
